

We have a September event!

Saturday 9/23 3PM-6PM at the Wendell Jacobs Studio in Davis

As you know the George Wright biography that has been widely anticipated in the theatre organ world is the result of two of our Sierra members: funding from Wendell Jacob with research and authoring by Bill Coale. I have seen Bill's proof copy and all I can say is WOW! It may have taken awhile to be finished but it is very thorough and beautifully produced with hundreds of photos.

The book printing will be finished in mid-September and Wendell has agreed to host a "book coming out" event at his Davis studio. Bill will have the books to take home for those who have already bought them plus extras for sale. Bill will do a roughly 45 minute presentation of experiences and vignettes about his over two years gathering material and talking to many people who knew GW. The just finished CD "Back to School" loaded with recently found Grant High GW interviews, songs, and a full radio show will be available.

The Moller will be supplying music through the playback system before and after. Open console of one song per player will follow Bill's presentation at the end of the program.

While not a picnic style event you can feel free to bring snacks.

We are inviting our Norcal Chapter friends.

P.S. No artfully done Organ Spiel Newsletter for this event because editor Terry Clifton is on a month long trip to Europe and will not be back until very near 9/23.
